PROFESSIONAL SUMMARY

Technical Project Lead and Aspiring Product Manager, driven by a passion for cross-functional leadership and end-to-end project ownership. Combining a technical background in Computer Science, Statistics and Economics with a proven ability to lead client discovery, manage stakeholder relationships, and mentor teams within student organizations and professional roles.

EDUCATION

B.Sc. in Computer Science, Statistics and Economics | University of Toronto St. George Campus

- **Relevant Coursework:** Machine Learning, Data Analysis, Computational Statistics, Web Development, Databases, Data Structures, Algorithms, Econometrics, Micro/Macro Economics, Financial Economics

Google Project Management Professional Certificate | Coursera Certificate

- Applied Traditional and Agile frameworks to manage project lifecycles, developing **project charters** and risk registers while building core competencies in stakeholder **communication, team leadership, and cross-functional collaboration.**

Machine Learning Specialization | Coursera Certificate

- Developed knowledge in **prediction, classification, and unsupervised learning** using techniques such as **artificial neural networks.** Applied **NumPy, Pandas, and scikit-learn** to build and optimize ML models.

CORE COMPETENCIES AND TECHNICAL SKILLS

Product & Leadership : Project Roadmap Strategy, Stakeholder Management, Account Management, Risk Mitigation, Cross-functional Leadership, Sprint Prioritization, Agile/Scrum, B2B Technical Discovery.

Data & Analytics : SQL (PostgreSQL), Data Analysis (Pandas, NumPy), Data Visualization (D3.js, Matplotlib), Statistical Theory, Econometrics.

Technical Proficiency : Full-Stack Development (JS, React, Node.js), Machine Learning (Scikit-learn), ETL, REST APIs, AWS Cloud Infrastructure, Git, Docker.

EMPLOYMENT HISTORY

Solutions Engineer (Technical Project Lead) | *The Bright Doctor*

Sept 2025 – Present

- Led technical discovery for B2B sales pitches, effectively communicating product capabilities to non-technical stakeholders to secure 5 key accounts.
- Managed **sprint prioritization and resource allocation** for a cross-functional team of 4, ensuring 100% on-time delivery of project milestones.
- Owned the **end-to-end lifecycle** of new features, from prototyping and user feedback through launch, **achieving a 60% adoption rate within the first month.**
- Developed automated sales enablement tools that streamlined the project pipeline, increasing lead visibility and **reducing manual data entry** tasks by 8+ hours weekly.

Solutions Developer | *Freelance*

June 2024 – Aug 2025

- Collaborated with stakeholders and designers to lead end-to-end development of production-ready platforms, providing technical guidance to junior developers.
- Engineered full-stack e-commerce and logistics solutions that drove business growth, resulting in over **400 new monthly users** and a **32% increase in service inquiries.**
- Architected responsive marketing sites and internal admin portals with integrated booking and CMS features, **raising inquiry volume by 19%** and acquiring **43 new paying customers.**

Sales Associate | *Berry's Bait & Tackle Ltd*

Apr 2019 – Sept 2020

- Served as a **technical domain expert**, conducting deep-dive discovery to provide tailored gear solutions for 700+ customers and increasing retention by 15%.
- Translated complex equipment specifications into clear, benefit-driven value propositions for diverse customers, **consistently exceeding monthly sales targets.**
